| TITLE: | Valid Adaptive signs for the Alpha Ethernet Adapter |
| ECO REFERENCE: | None |
| PRODUCT(S) AFFECTED: | Alpha Ethernet Adapter |
| SUMMARY: | The Alpha Ethernet Adapter works with these signs |

The Alpha Ethernet Adapter does not have its own power supply. It receives its power from the sign with which it is associated. An Alpha Ethernet Adapter will not work if the sign does not have sufficient power for the Alpha Ethernet Adapter.

The Alpha Ethernet Adapter works with the following signs:

- 215C, 215R
- 220C (all shipped after February 1, 2000)
- 300C series
- 4000C, 4000R series
- 7000C series
- Personal Priority Display (PPD)
- BetaBrite "One-Line" Display (P1026, P1036 and P1040)
- BetaBrite "Director" (all shipped after July 1, 2000)

The Alpha Ethernet Adapter does not work with the following signs:

- 210C
- 220C (all shipped prior to February 1, 2000)
- BetaBrite "Director" (all shipped before July 1, 2000)

Due to the variation in models and individual specifications, contact the Adaptive Customer Service Dept. for info on:

- AlphaVision

NOTE: This tech memo applies to Adaptive's Alpha Ethernet Adapter. It does not apply to the Lantronix MSS1-T or MSS485.
